Fishbeck
1515 Arboretum Drive S.E.
Grand Rapids, MI 49546

Dear Ms. Muscat,

Are you seeking an IT Support and Network Administrator with:

- **Proven Fishbeck Experience:** Prior success as a Seasonal IT Technician at Fishbeck—imaging PCs at scale using Tanium, resolving support requests to exceed 1M InvGate ticket points, and building custom AI-driven analysis tools?
- **Hands-on Systems & Network Administration:** Applied competence across Windows 11, Linux administration, SSH remote connections, network troubleshooting, service permissions, Docker, and system maintenance?
- **High-Volume Service Desk Reliability:** Demonstrated track record at Grand Valley State University managing dozens of phone inquiries and hundreds of support tickets with responsive, clear, and patient user support?
- **Proactive Problem-Solving:** An "if it isn't broke, do fix it" mindset backed by a 3.64 GPA in Information Technology at GVSU and ongoing CompTIA and Microsoft certifications?

If so, then you need look no further. Having worked with your IT team before, I understand Fishbeck's high standards and collaborative culture. Returning as an IT Support and Network Administrator means zero ramp-up time: I can step in immediately to resolve tickets, support team members, and ensure network and system reliability.

You can explore my projects, live labs, and maintenance records on my portfolio at andrewtvanekportfolio.online. I would welcome the opportunity to speak with you about how my technical skills and dedication can support Fishbeck. Please feel free to reach me at (616) 290-4236 or avanek737383@gmail.com. Thank you for your time and consideration.

Sincerely,

Andrew Van Ek
